AMBASSADOR'S MESSAGE

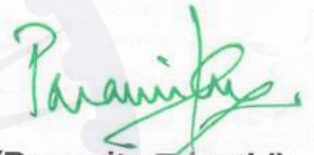

AMBASSADOR OF INDIA KUWAIT

I am happy to know that the Indian Community School (ICSK)- Junior is releasing its annual magazine, **SPARK 2025-26**. The magazine reflects the creativity, talent, and achievements of students from LKG to Class VI, and provides a wonderful platform for young minds to express their ideas and views.

Congratulations to the Principal, teachers, parents, and students for their efforts in bringing out this publication.

I extend my best wishes to the ICSK Junior.

***Our commitment is — to stand beside every student, nurture every dream,
and celebrate every step forward.***

The Academic Year 2025–26 has been a joyful and enriching chapter for the Indian Community School Kuwait, Junior Branch. Rooted in care, creativity, and curiosity, the school has continued to provide a safe and stimulating environment where young learners grow with confidence, imagination, and strong foundational values.

This year's learning journey came alive through thoughtfully designed programmes that encouraged exploration and self-expression. Pearl Fest 2025 was a shining example of this spirit, bringing together artistic brilliance, academic strength, and the many talents of our young achievers. It reflected the school's deep commitment to holistic development, ensuring that every child feels seen, supported, and celebrated.

The warmth of collaboration was beautifully evident in Brushes and Bonds, a drawing and colouring initiative that brought parents and children together. Equally inspiring was Creante – The Creative Corner: One World, Many Wonders, which offered students an engaging platform to showcase ingenuity, artistic skills, and subject knowledge in an integrated and meaningful way. The Astronomy Club sparked wonder and inquiry, guiding students to explore the universe while developing scientific thinking, observation, and mathematical understanding often inspiring a lifelong love for discovery.

The Board of Trustees sincerely appreciates the dedication of the Principal, teachers, coordinators, and support staff whose passion and commitment continue to shape a joyful learning experience for every child. We are equally grateful to parents for their trust, cooperation, and active involvement, which play a vital role in their children's growth.

To our dear students: stay curious, be kind, and enjoy the journey of learning. Every small effort you make today builds the bright future you deserve.

With warm wishes,

Board of Trustees

Indian Community School Kuwait – Junior Branch

SENIOR ADMINISTRATOR'S MESSAGE

Dear Students,

I am delighted to have the opportunity to share a few words in this wonderful edition of the school magazine. As I go through its pages, I am deeply impressed by the creativity, enthusiasm, and thoughtful expression reflected in your work.

A school magazine is more than a showcase of talent—it is a reflection of the culture and values nurtured within an institution. It is heartening to see that alongside academic learning, equal importance is being given to values such as respect, kindness, honesty, and responsibility.

In today's fast-changing world, value-based education plays a vital role in shaping not just capable learners, but responsible and compassionate individuals. The lessons you learn about empathy, integrity, and cooperation will remain with you far beyond your school years. It is also important to remember that values are best learned through everyday actions. The way you treat your friends, the respect you show to your teachers, and the responsibility you take for your actions are all part of your true education.

I extend my sincere appreciation to the school leadership and teachers for their unwavering commitment to nurturing both the intellect and character of their students. Such an environment lays the foundation for a meaningful and successful future.

I encourage the students to remain curious in learning, humble in success, and gracious in your actions. Continue to uphold the values you are being taught and let them guide you in every step you take.

May this magazine stand as a proud reflection of your journey and a reminder that true education is measured not only by what you know, but by who you become.

Warm Regards

Dr. V. Binumon

Principal & Senior Administrator, ICSK

PRINCIPAL'S MESSAGE

"Learning gives creativity, creativity leads to thinking, thinking provides knowledge, and knowledge makes you great."

Dear Students, Parents, and Esteemed Readers,

In an era where sustainability and environmental responsibility are more crucial than ever, it gives me immense pleasure to present our Annual School Magazine, SPARK, in its digital form. This initiative not only embodies innovation but also contributes to conserving nature by reducing paper usage.

It is an absolute honour and privilege to address you through the pages of this magazine, a vibrant celebration of the creativity, accomplishments, and dynamic life of our school community. This magazine is not merely a collection of events; it is a reflection of the spirit, imagination, and voices of our students.

Our school, with classes ranging from Kindergarten to Grade 6, is truly a nurturing haven where young minds begin their journey of discovery and growth. These formative years are crucial in laying a strong foundation for lifelong learning, character building, and instilling essential values such as kindness, integrity, resilience, and respect.

At our institution, education goes far beyond textbooks and classrooms. We believe in the holistic development of every child, nurturing their potential in academics, sports, arts, music, and leadership. We aim to shape not only knowledgeable individuals but also compassionate, responsible, and future-ready global citizens.

This magazine stands as a testimony to the vibrant tapestry of our school's journey. Each article, poem, story, and artwork showcases the creativity, talent, and thoughtful expression of our students. It is a treasure trove of ideas and a mirror reflecting their dreams, aspirations, and achievements.

Dear students, I encourage you to embrace every opportunity that comes your way. Be curious in your learning, courageous in your efforts, and compassionate in your actions. Let your imagination soar, your thoughts find expression, and your actions make a positive difference. Always remember that each one of you is unique, capable, and destined to shine in your own special way.

I take a moment to appreciate our students for their enthusiasm, discipline, and continuous efforts in making our school proud. Your achievements, both big and small, inspire us every day. The way you balance academics with co-curricular activities, while upholding the values of the institution, is truly commendable.

Our heartfelt thanks go to our parents and stakeholders, whose cooperation, trust, and unwavering involvement play a vital role in shaping the future of our children. Your wholehearted partnership throughout this journey of learning and exploration strengthens our shared vision and mission and builds a strong foundation upon which our students grow and thrive.

I would like to extend my sincere gratitude to our highly supportive management, whose vision and encouragement enable us to achieve new milestones. Their constant guidance empowers us to deliver quality education and foster holistic development. My heartfelt appreciation goes to the editorial team for their dedicated efforts in bringing out this beautiful digital magazine. Their creativity, coordination, and commitment have culminated in a remarkable publication that captures the essence of our school in the most engaging and meaningful way.

I take this opportunity to express my deep appreciation for our dedicated and committed staff, whose tireless efforts and passion form the backbone of our success. Their steadfast support continues to guide and inspire our students towards excellence.

As you turn the pages of this magazine, I hope you experience a sense of pride and joy in the journey we have collectively undertaken. May it inspire, motivate, and remind us all of the limitless potential within our students.

Let us continue to work together with dedication and purpose to create a nurturing environment where every child can dream, discover, and succeed.

Warm regards,

C.Sheeja

Principal- ICSK Junior

VICE PRINCIPAL'S MESSAGE

"A school that sparks curiosity, nurtures hearts, and celebrates every voice — that is the school we are proud to build together."

Dear Members of our ICSK Family,

Welcome to Spark — and what a year it has been. This edition arrives in a new form: digital, boundless, and alive on your screens. A small change in format, perhaps, but a rather fitting one for a generation that sees the world with fresh eyes and reaches for it with curious hands.

Every page of this magazine — every photograph, every article, every word — is a story that lived first in a classroom, a corridor, a playground, or a stage. It is the story of children who embraced every opportunity, of teachers who poured their hearts into each day, and of a school community that has grown beautifully together. We are fortunate to have journeyed under the steady guidance of our Principal, whose vision and dedication have always kept us grounded in what truly matters.

Dear children — from our littlest ones in KG to our growing leaders in Grade 6 — here is something worth holding close: the world belongs to those who stay curious and keep trying. Raise your hand boldly, cheer for your friends wholeheartedly, and never stop asking "why" and "what if" — because a curious mind and a kind heart together are the most powerful combination you will ever carry. You are not just the future; in these pages, you already are the present.

Our teachers are the quiet architects of confidence and wonder — their dedication runs far deeper than any page can reflect. The warmth and trust of our parent community has equally been the heartbeat of everything we do here, and we are deeply grateful for that enduring partnership.

We acknowledge with deep respect and gratitude the unwavering support of our Board of Management, whose visionary leadership continues to be the bedrock on which this institution stands and grows. It is their guidance that gives us the confidence to dream bigger for every child in our care.

May Spark continue to do exactly what its name promises — and may every page within it inspire you as much as you have inspired us.

With gratitude and warm regards,

Santhi Krishna

Vice Principal -ICSK Junior

ACADEMIC COORDINATOR'S MESSAGE

"Dream big, work hard, stay humble, and be kind."

We live in an era of breathtaking technology. Screens are everywhere — bright, loud, and endlessly entertaining. Yet somewhere in that glow, something precious is quietly disappearing. Attention. Patience. The art of thinking. Studies confirm what wise teachers have always known — the hand that writes, remembers. The mind that focuses, grows. When a child picks up a pen and forms each letter with intention, they are not merely writing — they are building neural pathways, sharpening memory, and strengthening the architecture of intelligence itself.

"The pen is the tongue of the mind, but kindness is the language of the heart."

Screen addiction is not just a habit — it is a thief. It steals your time, your focus, your originality, and quietly replaces your dreams with someone else's content. Guard your attention fiercely. It is your most valuable academic asset. And yes — dare to dream. Dare to achieve.

But before the certificates. Before the trophies. Before the accolades — be a good human being.

Exhibit compassion, tolerance and gratitude— make room for perspectives different from your own. Be empathetic — look beyond yourself and into the hearts of those around you. Be understanding — pause before you judge others, and think twice before you speak.

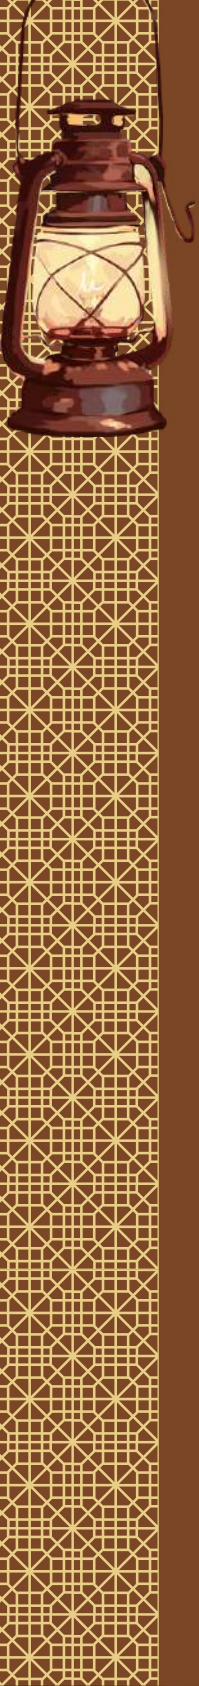

The world does not just need brilliant minds — it desperately needs beautiful souls.

Children, your handwriting is your identity. Neat, clear handwriting is more than just a skill—it is a discipline, a mirror of one's personality. Your focus is your superpower, your dreams are your destiny, and your humanity is your greatest achievement. Pick up your pen. Fill pages. Dream boldly. And always, always — choose kindness.

May every page remind you of what you are truly capable of — not just as a student, but as a human being this world is better for having.

Mrs. Lubna Lodhi

Academic Coordinator, ICSK Junior

EDITOR'S PERSPECTIVE

Some moments in life do not announce themselves — they simply arrive, quiet and luminous, like the first light of dawn. A spark. An idea. A dream that refuses to be silenced. ICSK Junior has always been that rare and remarkable place where such sparks do not flicker and fade — they ignite, they blaze, and they illuminate. As you turn the pages of Spark, you do not simply read a magazine — you witness a generation in full flight. Each word, each artwork, each idea contained herein is evidence to the perseverance, the passion, and the boundless brilliance of our young minds. This edition does not merely document what our students have done — it celebrates who they are becoming.

With profound gratitude and a heart full of joy, I first bow before the Almighty, whose grace has been our constant compass and guiding light. I extend my deepest appreciation to our esteemed Principal, Mrs. C. Sheeja, whose wisdom runs deep and whose visionary leadership has set the gold standard for all of us. My sincere admiration goes to our dedicated Vice Principal, Mrs. Santhikrishna, whose steadfast encouragement has been a pillar of strength for students and staff alike. To our editorial board, our tireless teachers, and our passionate students — your dedication has transformed effort into art. You are the true architects of Spark.

A very special word of heartfelt appreciation is reserved for Mrs. Mariam P Chacko, whose creativity, meticulous dedication, and radiant energy have breathed life, colour, and charm into every page, including the cover page of this magazine. Without her, Spark would be words alone. With her, it becomes an experience. May every page you read spark something beautiful and satisfying within you. Thank you

The Editorial Team Spark, ICSK Junior

ENTER THE REALM OF CREATIVITY

The school magazine's cover page captures the spirit of academic excellence through artistic expression and intellectual growth. It proudly showcases the achievements of our students in a way that is both inspiring and memorable.

Every detail on the cover reflects a thoughtful vision — where art meets purpose, and creativity speaks louder than words.

Heartfelt congratulations to **Mrs. Mariam P Chacko** for designing this stunning cover. Your creativity and attention to detail have truly brought the school's mission to life.

COVER PAGE AND MAGAZINE DESIGNED BY

MRS. MARIAM P CHACKO

ANNUAL REPORT 2025 -26

It is with immense pride and heartfelt gratitude that we present the **Annual Report** for the academic year **2025–26** — a luminous chronicle of our collective pursuit of excellence. Another remarkable year has drawn to a close, abundant with aspirations realised, hurdles surmounted, and milestones etched with diligence and determination. Guided by a forward-looking vision, we cultivated an environment where intellectual development thrives and every challenge transforms into a stepping stone. Every learner was empowered to spread their wings, explore their potential, and soar beyond the boundaries of the ordinary. A rich and diverse array of activities were thoughtfully curated, for the well-being of our students. They immersed themselves wholeheartedly, accumulating an enviable repertoire of experiences well beyond the confines of the classroom.

The year commenced on an auspicious note with the highly anticipated **LKG Parents' Orientation Day** — a significant occasion that fortified the parent-teacher partnership, illuminated the curriculum, and empowered families to champion their child's holistic development. The academic calendar was further graced by memorable events such as the **Investiture Ceremony, Pearl Fest, Brushes and Bonds, Creante – The Creative Corner, Anugrah – The Blessing Ceremony, and UKG Graduation Day**. Each event added vibrancy and left behind a treasury of cherished memories. The enthusiastic support and heartwarming appreciation extended by parents made every occasion all the more gratifying and truly unforgettable.

The **Satrarambh Assembly** heralded the commencement of the new academic year with great enthusiasm. A series of theme-based assemblies followed throughout the year — **the Foundation Day, Golden Rules of Hygiene, The Magic of Books, Gandhi Jayanti, Children's Day, Teacher's Day, The Importance of Time Management, Dream Big – Achieve Big, Republic Day, and Kuwait National Day and Liberation Day**. Students invested tremendous effort into each presentation, and the results were nothing short of a visual and intellectual delight.

The school played proud host to a series of competitions that drew young enthusiasts from across branches. Students demonstrated remarkable talent and dedication in **inter-branch competitions**, showcasing their intellectual prowess through exhilarating events like the **Annual Sports Meet, Rhythmic Resonance, and Smarticus**. These platforms promoted wholesome competition and academic vigour. Hard work and determination translated into well-deserved triumphs, with many students winning prizes and bringing laurels to the school.

Students of ICSK Junior participated actively in a wide range of inter-school competitions, significantly bolstering their confidence and strengthening their sense of collaborative teamwork. Balancing academic commitments with rigorous preparation, they forged lasting bonds with teammates in the process. Prestigious events such as the **Kuwait Cluster Meet, Shaastrotsav, Expressions, Quiz Competitions, and Excellencia** offered our students **invaluable opportunities to engage with a broader world and measure their mettle on a wider stage.**

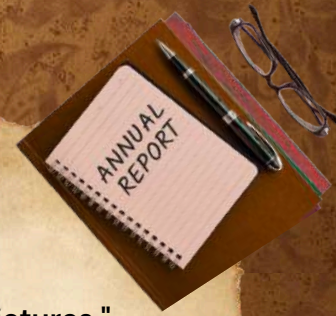

The Best Morning Assembly, Best Class of the Fortnight, and Star of the Week awards served as inspiring benchmarks of behavioural excellence and disciplined conduct. These coveted accolades motivated students to sharpen their presentation skills and persistently strive for distinction.

The **School Clubs** significantly enriched the educational experience by offering a kaleidoscopic range of pursuits — **public speaking, quizzing, junior chefs, sewing, knitting, craft and embroidery, language club, Vedic Math, dance, music, board games, science, technology, and fashion exploration.** The **Astronomy Club** nurtured scientific curiosity and cultivated a deeper awareness of the cosmos. These extracurricular endeavours instilled self-expression and personal growth, elevating students well beyond the boundaries of the traditional curriculum.

Evening activities encompassing **sports, public speaking, music, dance, and art classes** played a pivotal role in nurturing the multifaceted growth of our students. **Ice Skating and Swimming classes** provided a delightful balance of physical vigour and mental stimulation. The students' punctuality and passionate participation were a joyful testament to their dedication. The **Care Club** continued to nurture compassion and community, building a culture of empathy that permeated the school's ethos. Our **Remedial Classes** provided structured and dedicated support to every learner, ensuring that no child was left behind. Together, these programmes reflect the institution's deep commitment to inclusive excellence. Every step taken this year brought us measurably closer to a stronger, kinder, and brighter school family.

The school-organised **excursion to Dubai** offered students an exceptional fusion of education and adventure, broadening their cultural awareness and expanding their global perspective. Such enriching trips augment the school curriculum by championing experiential learning. Meticulous planning ensured a seamless and joyful journey, leaving every participant with lasting memories and invaluable life lessons.

The **cleanliness drive, 'Hand in Hand — Let's Clean the Land,'** was an inspiring initiative that promoted hygiene and environmental stewardship. Children participated enthusiastically, cleaning their bags, classrooms, and surrounding areas with remarkable team spirit. Such purposeful efforts instill a lifelong commitment to cleanliness and civic responsibility. A sparkling feather in our cap was **Brushes and Bonds**, where parent-child duos collaborated to create stunning works of art across three categories: crayon, pencil shading, and watercolour. Each creation radiated creativity and the beautiful bond shared between parent and child. The palpable enthusiasm with which every team approached this unique opportunity made it one of the most cherished events of the year.

"Every artist dips his brush in his own soul and paints his own nature into his pictures."

Hues in Queues, the Drawing and Painting Competition, exhibited an immense and exhilarating response, drawing out the creative spirit of participants across the school. Students explored a vibrant spectrum of themes, using colour to breathe vivid life into their most imaginative ideas. Splattered across paintings and drawings, brilliant hues turned every canvas into a world unto itself. Special training classes organised throughout the year proved highly beneficial, sharpening artistic skills and building confident young creators.

The '**Drop a Coin**' initiative beautifully reinforced the principle that joy grows when shared through giving. Aimed at nurturing empathy for the less fortunate, this drive encouraged acts of kindness and collective goodwill, proving that compassion has the power to create a more equitable and peaceful world.

ICSK Junior proudly conducted the much-celebrated **Meet the Professional** sessions, bringing accomplished experts from diverse and exciting fields to inspire its young learners. This remarkable platform succeeded in sparking curiosity and igniting a spirit of inquiry among students. It was indeed an empowering initiative that inspired every student to dream bigger, aim higher, and embrace a future full of limitless possibilities!

Enriching learning experiences for LKG to Grade VI students deepened conceptual understanding through diverse **CCA, SUPW, and Circle Time activities**. For our kindergarteners, Joyful Thursdays — dedicated to fun, books-free, lighter-bag days filled with music, storytelling, and hands-on learning — created a wonderfully stress-free environment that nurtured creativity and social skills in equal measure.

The school radio, **Tarang**, continued to be a joyful platform nurturing creativity, strengthening communication skills, and building confidence in our young broadcasters. Children delighted in writing scripts and taking their voices on air — a truly empowering experience. The Literary Skills activities, introduced to enrich vocabulary and spellings, were received with great enthusiasm. Periodic Tests, conducted with concise and targeted question papers, kept students engaged and well-prepared between terminal examinations.

The Astronomy Workshop — Astro Venture — and the Planetarium Show were among the most celebrated gifts the school offered its students this year. These immersive experiences satisfied the students' boundless curiosity about stars, planets, and the magnificent wonders of the universe, leaving young minds inspired, informed, and starry-eyed.

Thus, we concluded the **academic year 2025–26** with great pride, cherishing every moment of the journey and celebrating our achievements alongside our dedicated staff and enthusiastic students. Together, we created lasting memories, bore witness to extraordinary growth, and experienced the warmth of unity within our vibrant school community. While we take immense pride in what we have accomplished, we recognise that even greater horizons await us. With renewed passion, purpose, and commitment, we look forward to new challenges, loftier milestones, and even brighter successes in the year ahead.

It was a pleasure to be at the School for the inauguration ceremony. Thanks for the invitation. I really appreciate the hard work of the teachers, students and principal for the function. The function went well and I was impressed by the performance of the students. Wish all the new elected leader good luck and bring laurels to the school. All the best.

Saba Chidam.
24/04/25

Your event is highly organized and effective shows in a new innovation education way, which can be one of the best take home messages for this generation. I am very happy to see such an event, which can be an ideal way of school education. I wish you all the best and good luck.

DR. SHAKER ALHAZEEM

It was an absolute pleasure to be part of the Pearl Fest Award Ceremony. I thoroughly enjoyed the event and was truly honored to contribute.

As someone from the event management field, I understand the immense effort and attention to detail required to pull off an event of this scale. Hats off to you and your entire team—what a commendable job!

The event was meticulously planned and flawlessly executed—from the stage décor to the invites, the program scroll, the bookmark, the performances—every element reflected thoughtfulness and precision. Truly impressive work. Kudos to both the team and the inspiring leadership behind it all.

Warm regards,
Crawford Wilson D'souza

12-02-2026

It was a great experience to witness the graduation ceremony. The program was well organized. The children performed so fantastically. Nice to see the school growing to greater standard day by day. I wish the Principal Sheega Maan and her dedicated team all the best.

Thank you and all the best.

Hearty Congratulations !
Juanita Jawahar Dinaharan of Class 5 F

**2nd prize Winner in the Junior Category of Spin a
Yarn contest conducted by IIK**

Congratulations to the 3rd prize winner in creative and eco – conscious event titled “Transfoming Scraps into Stories of Sustainability” conducted by ICSK SENIOR

Winners:

Ayesha Rehamatullah Jalgaonkar –6 A
Naomi Elsa Reju– 6 C.

Congratulations to the Runner up in Poster Making competitions conducted by TEF InnoEx 2025

Winners:

Shamitha Saravana Kumar – 6 D
Nishi Lohar–6 E

Hearty Congratulations!
Prajana Suresh Babu –6 A

3rd prize in Rubiks Cube Solving competition conducted by TEF InnoEx 2025

Congratulations to the 3rd prize winners in Choral Cadence conducted by GIS School

Reyna Elizabeth Philip of 3 D, Ezekiel Joy Muttamthottil of 3E
Niharika Prajesh Menon of 3 E, Zahra Shabbir Husain Ajnawala
Cera Ann Geo of 4 E, Nisreen Sarah Alfanali of 4 D
Hridya Robin 4 B, June Celeste Mathews of 5 C
Ivana Liz Thomas of 4 F, Aastha Rinu of 4 F
Naira Miriam Rohan of 4 F, Reeve Josh Concessao of 4 G

Hearty Congratulations! Swetha Anusha Satheesh Kumar 4 C
2nd position in Xpressions 2025 Solo Singing conducted by IEAS

Congratulations to the 3rd prize winners in Xpressions 2025 Group Singing conducted by IEAS winners
Kanishka Kulali Sampath Saravanan – 3 F, Naira Miriam Rohan – 4 F
Mishel Rose Majeeshmon – 2 E, Parin Bhovi – 4 B
Lijon Lalgin – 2 E, Amvi Sapaliga – 3 D
Aaradhya Varshney – 5 D, Manaal Anees – 3 D, Reyna Elizabeth Philip – 3 D
Reeve Josh Concessao – 4G, Venba Sarupriyan – 3 A

Hearty Congratulations Pavya Venkatesan 1 B

1st prize Winner in Grand's Kids Drawing
competition conducted by Grand Hypermarket

Hearty Congratulations Avnitha Jagadeesan of
Class 6 F

1st Prize Winnerin both Freestyle and Backstroke
category conducted by Elite Future Furies
Championship 2025

**Congratulations to the consolation prize winners in
Shaastrotsav 2025 – Inter- School Science Project &
Exhibition**

Winners:

Danshika Senthil Rathinam – 6 C

Patricia Lilly Pinto – 6 E

Riyana Caitlin Casmir Arockia Raj – 6 C

**Congratulations to the Level 1 winners of Sastra
Prathiba Contest 2025**

Aneesah Fathimah Muhammed Mazhar – 4 A

Abdul Aziz – 4 C

Swetha Anusha Satheesh Kumar – 4 C

June Celeste Mathew – 5 C

Juanita Jawahar Dinharan – 5 F

Ayaan Muhammed Jishad – 6 E

Prajana Suresh Babu – 6 A

Hearty Congratulations Mayank Roshan of UKG A

**3rd prize winner in the International Gita Chanting
Competition**

Congratulations to the winners of Interschool Hindi competition – Nukkad Natak organized by Bhavans

Winners:

Amog Sapaliga – 6 A, Madiha Fatmi – 6D
Zainab Miyaji – 6 B, Saud Mohammed – 6 B
Avishka Bhandary – 6 C, Ilham Syed – 6 D
Shreehari Deepak – 6 C, Nishi Lohar – 6 E
Ehan Ahmed – 6 F, Fatema Phalasiya – 6 F

Hearty Congratulations Niharika Prajesh Menon 3E
3rd prize winner of NIRAM 2025 painting competition
conducted by KALA Kuwait

Congratulations to the winners of NIRAM 2025 painting competition conducted by KALA Kuwait:

Nawal Arifulla Khadas MERIT 1B, Pavya Venkatesan MERIT 1B
Geethika Rahul Raj MERIT 3A, Shivanuja Madhu MERIT 4A
Sharvani Rohit Panchal MERIT 4A, Dev Shyju CONSOLATION 1F
Serah Josh CONSOLATION 1A, Inaaya Ismail Khan CONSOLATION 1B
Hussain Kazi CONSOLATION 1B, Helsina Matlin CONSOLATION UGK A
Devansh Vyshakh CONSOLATION 3G, Taqdees Kawchali CONSOLATION 3B
Hridya Robin CONSOLATION 4B, Cera Ann Geo CONSOLATION 4E
Anam Iqbal CONSOLATION 4F, Vanshika Podishetty CONSOLATION 4F
Aadhithya Kolanchi CONSOLATION 5A, June Celeste Mathews CONSOLATION 5C
Irene Mariya Prince CONSOLATION 5C, Tanvi Nithin CONSOLATION 5E
Theertha Pradeesh Nair CONSOLATION 6C

Hearty Congratulations

Pavya Venkatesan (1B) 1st place in Tamil Poetry
Recitation.

Akshagan Venkatesan (4F) 2nd place in Tamil
Poetry Recitation organized by Nandavanam,
Kuwait

A gesture of love and inclusion- Junior students performing at Kuwait Handicapped Society

**Congratulations to the winners of
The Holy Quran Competition**
Aisha Abbas 3 D
Taha Nogama 3 D
Aaira Khan 4 G
Khadija Chikte 6 C
Zarrar Fazi Vilack 2 D

CONGRATULATIONS

Hearty Congratulations Patricia Lilly Pinto – Class 6 E
awarded the APJ Abdul Kalam Pearl of the School
Award 2025 by Thanima Kuwait

Hearty Congratulations Chris Vinoy Mathew of 6 E

2nd position (Runners UP- Doubles) & Semi Finalist (Singles) in the U 13 Boys Category in the iSMASH GCC Junior Open Badminton Championship Season 2

Hearty Congratulations Chris Vinoy Mathew of 6 E

1st prize winner in Mixed Doubles in KMBL 2025 tournament

Hearty Congratulations Chris Vinoy Mathew of 6 E
2nd position (runners up – singles) & (runners up – doubles) in the U13 Boys category in the iSMASH GCC Junior Open Badminton Championship Season 3

Hearty Congratulations Aaran Santhosh of 6 D
Semi – Finalist position in the U13 Boys' Doubles category at both the iSMASH GCC Junior Open Badminton Championship – Season 3

Kindergarten Graduation Ceremony was celebrated with great joy and enthusiasm 2026

Monday, March 2, 2026

The Kindergarten Graduation Ceremony was celebrated with great joy and enthusiasm on 12th February 2026, marking an important milestone in the academic journey of the UKG students. The programme was thoughtfully planned and beautifully executed, creating cherished memories for the students, parents, and teachers alike.

Beyond Borders, Beyond Imagination: Creante @ ICSK Junior Unites the Globe in a Symphony.

Tuesday, January 27, 2026

The Indian Community School Kuwait - Junior orchestrated a magnificent exhibition titled 'Creante - The Creative Corner' on 8th January 2026, demonstrating the extraordinary talents of students from LKG to Grade 6. This phenomenal event provided an exceptional platform for young learners to display their ingenuity, artistic prowess, and comprehensive

'Brushes and Bonds Parent and Child duo paints magic at ICSK Junior

Tuesday, December 23, 2025

'When Parents and Kids Create Magic Together, Every Colour Tells a Story. This magic unfolded at ICSK Junior on 13th December 2025, during 'Brushes and Bonds', a parent-child drawing competition where colour created powerful bonding experiences. These collaborative moments strengthened relationships as parents and children learned to share ideas and celebrate their unique creations—transforming vibrant artworks into cherished memories of joy and connection.

Full-day extravaganza as ICSK junior celebrates Children's Day

Monday, November 24, 2025

Children are like butterflies—each beautifully different, together they make the world dance with joy.

The Children's Day Assembly at ICSK JUNIOR on November 13, 2025, was a lively celebration honoring the 136th birth anniversary of Pandit Jawaharlal Nehru.

The poster features a white background with vibrant, abstract brushstrokes in red, orange, green, and brown along the edges. The text is arranged in four lines. The first line, 'Party', uses cutout letters with colored pushpins. The second line, 'Time', also uses cutout letters with pushpins. The third line, 'FULL', is in a simple blue font. The fourth line, 'CELEBRATION', is in a bold, red, slanted font. The final line, 'VIBES', uses large, multi-colored block letters.

GUIDANCE FROM THE

Dear Children,

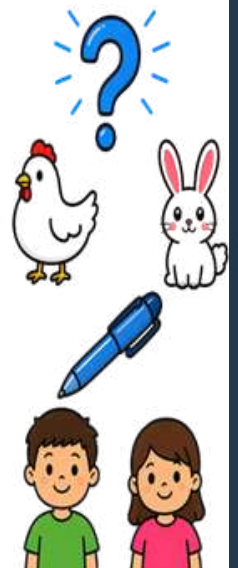

Math is not just about numbers—it is about thinking smart and observing carefully. These puzzles are designed to make you pause, observe, and think differently.

Do not rush to find the answer. Read the question, analyze it carefully, and think logically. Even if you make mistakes, keep trying—that is how your thinking becomes stronger!

👉 Challenge yourself, enjoy the process, and have fun with maths! 😊

🧩 Math Puzzle Corner

- (1) Which is heavier: 1 kilogram of cotton or 1 kilogram of iron?
- (2) On a farm, there are 8 heads and 20 legs. If there are only chickens and rabbits, how many rabbits are there?
- (3) Two fathers and two sons went shopping. They bought 3 pens, and each person received one pen. How is this possible?
- (4) A boy is 10 years old, and his sister is half his age. When the boy becomes 20 years old, how old will his sister be?

Sivagami Kumar

Asst. HOD (Math) & Activity Coordinator

A JOURNEY INTO THE WORLD OF INVERTEBRATES

The sun was shining brightly. For Suhana and her class 6 classmates, this wasn't just a Thursday- it was the day when the dreamy circular finally came to life. Two weeks ago, when their teacher, Ms. Alizah, had handed out the permission slips detailing a field trip to the 'Kuwait Marine Scientific Center', the classroom had erupted with excitement. The school bus whirred down to silence as it pulled into the parking lot of the Kuwait Marine Scientific Center. Ms. Alizah said "Meet the Invertebrates, they make up about 97% of all animal species on our planet". Suhana an intellectually curious student gripped her notebook tightly to note down whatever information Ms. Alizah delivers. Here is the content of Suhana's journaling.

1. The Giant Squid. The giant squid is one of the most mysterious creatures of the deep sea. It has eyes as large as a dinner plate or a human head. It breathes through gills and has three hearts that pump blue blood. It had eight arms and two long feeding tentacles to catch its prey. They move through the waters using "jet propulsion" by squirting water out through a muscular funnel.

2. The Moon Jellyfish. Moon jellyfish are beautiful, translucent creatures that look like floating mushrooms. Their bodies are made of 95% water, which helps them float easily in ocean currents. They don't have a brain, a heart or even blood! They have short tentacles around the edge of their bell that contain stinging cells. They breathe by absorbing oxygen directly through their thin skin. They are found in almost every ocean in the world.

3. The Common Octopus. The Octopus is the smartest of all invertebrates. It has nine brains. One central brain and eight 'mini brains' located at the base of each arm. They have no skeleton. When they are scared, they squirt a cloud of black ink to confuse their attacker and escape. They have three hearts that pump blue, copper-rich blood. Octopuses are famous for solving puzzles. They are the ultimate masters of camouflage and intelligence.

4. Starfish. Starfishes may look like pretty decorations, but they are actually tough predators. They don't have a skeleton. They have five arms surrounding an indistinct central disk. Underneath their arms are hundreds of 'tube feet' that act like suction cups. If a starfish loses an arm to a predator, it can grow a brand new one over time. They don't have a brain or blood. They come in many colours like bright red, orange, and even blue.

5. The Sea Urchin. Sea urchins are round, spiky invertebrates that look like underwater hedgehogs. Their entire body is covered in sharp spines that protect them from being eaten by fish or otters. They have a very special mouth on the bottom of their body called 'Aristotle's Lantern', which has five sharp teeth. Some sea urchins are brightly coloured, while others are dark purple or black. While most live about 30 years, the Red Sea Urchin is one of the longest living creatures on Earth. Some have been found to live for 200 years! As the sun began to set over the Kuwait Marine Scientific Center, Suhana closed her notebook with a sense of wonder. They realised that while these "spineless wonders" lack backbone, they possess some of the most extraordinary survival skills on the planet.

Penned by,

**AnisFathima,
Asst HOD, Faculty of Science.**

☀️ BORN TO WIN ☀️

Dear Students,

Every child in this world is born to win. Winning does not always mean coming first or getting the highest marks. It means trying your best, learning from your mistakes, and never giving up.

Each one of you is unique and special. You all have talents waiting to shine—whether it is in studies, sports, art, or helping others. Remember, success is not about being better than others; it is about becoming better than you were yesterday.

There will be times when you may fail, feel sad, or want to give up. But always remember—every great winner has faced challenges. What makes them winners is their courage to stand up again and try one more time.

Believe in yourself. Work hard. Stay kind. Help others. And most importantly, never stop dreaming.

YOU ARE STRONG. YOU ARE CAPABLE. YOU ARE BORN TO WIN.

With love and best wishes,

Your Teacher

Najima Begam

EVS DEPARTMENT

INVINCIBLE

In the midst of storm
Stood a little flower
Holding onto the ground
Her petals quivered a little
Her leaves trembled out of fear
Still her roots deep as her faith
Stood firm throughout the time
Nor the tall pine tree, neither the thick teakwood
Couldn't escape the storm and embraced the ground
No queen rose neither her thorn knight
Survived the wind undoubtedly
Maybe you wonder how?
A tiny plant, invisible to your eyes,
With no fragrance to claim,
Endured what others could not...
That even the fiercest storm
Could not untether her from land!

Aysha Nejla
English Department

THE INVISIBLE ENGINE: HOW COMPUTER SCIENCE SHAPES THE MODERN WORLD

Take a moment to think about your day. You wake up to a smartphone alarm, scroll through social media, attend online classes or meetings, stream music, and maybe even order food with a few taps. It all feels effortless—but behind this seamless experience lies a powerful force working quietly in the background: computer science. Often unnoticed, computer science acts as the invisible engine driving modern life. It's not just about coding or computers; it's about solving problems, building systems, and creating technologies that shape how we live, learn, and connect.

Beyond Screens and Keyboards

Many people think computer science is limited to programmers typing lines of code. In reality, it goes far beyond that. It powers the apps we use, the websites we browse, and the networks that keep us connected. Every search result, recommendation, or notification is the result of carefully designed algorithms working behind the scenes.

From artificial intelligence helping doctors detect diseases early to data systems predicting weather patterns, computer science plays a role in decisions that affect millions of lives every day.

Transforming Education and Learning

One of the most noticeable impacts of computer science is in education. Students today have access to a world of knowledge at their fingertips. Online platforms, virtual classrooms, and interactive tools have made learning more flexible and personalized than ever before.

Whether it's attending a live class from home, watching recorded lessons, or using apps that adapt to individual learning speeds, technology has redefined how students learn and grow. It has also opened doors for learning new skills—from coding to digital design—preparing students for a future driven by technology.

Connecting a Global World

Computer science has erased boundaries. A message sent in one part of the world reaches another in seconds. Video calls allow families, friends, and colleagues to stay connected despite physical distance.

Social media platforms, cloud computing, and communication tools have created a truly global community. Ideas can be shared instantly, collaborations can happen across continents, and opportunities are no longer limited by location.

Driving Innovation and the Future

The future is being built on the foundation of computer science. Technologies like artificial intelligence, machine learning, robotics, and cybersecurity are not just buzzwords—they are shaping industries and redefining possibilities.

Self-driving cars, smart homes, virtual reality, and even brain-computer interfaces are becoming part of our reality. These innovations are not just changing how we use technology, but how we interact with the world itself.

The Power Behind the Scenes

What makes computer science truly remarkable is that it often goes unnoticed. Like an engine hidden beneath the hood, it powers everything without demanding attention. Yet, without it, much of modern life would come to a standstill.

As we move forward, understanding and appreciating computer science becomes more important—not just for those who want to pursue it as a career, but for anyone living in today's digital world.

In the end, computer science isn't just a field of study—it's the silent force shaping our present and building our future.

Beyond the Big Screen: The Magic and Meaning of Animation

We live in a world of "trends." From viral dances to celebrity-inspired challenges, our screens are filled with content that disappears as quickly as it arrives. Let's be honest— it's easy to get lost in the "**trends**" today. Everywhere we look, there's a new viral dance to learn, a celebrity to copy, or a 15-second trend that everyone says we have to follow. But here's a little secret: those trends move fast, but they don't usually leave us with much. They're like bubbles, bright for a second, then gone. As we look toward the future, it is important to remember that the stories we consume shape the people we become. This is why high-quality animation is so powerful. It doesn't just ask us to "follow" or "copy"—it asks us to **think, feel, and lead**.

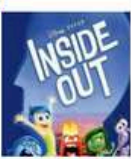

If you want something that actually sticks with you, something that helps you figure out who *you* are, then look at the stories you're watching. Great animation isn't just "pixels on a screen." It's a mirror for our hearts.

Beautiful Messages for Young Hearts

Today's animated movies do more than entertain; they help us grow. Here are some of the most beautiful lessons our students can learn:

Movie (Year)	Core Message	Key Takeaway for Students
WALL-E (2008) 	Consumption and Pollution: A warning about consumerism and extreme pollution, especially the garbage covering the Earth, forcing humanity to flee into space.	Recycle and Reduce: Our daily consumption choices have planetary consequences. WALL-E's love for a tiny seedling represents hope and the need to nurture life.
The Lorax (2012) 	Deforestation and Corporate Greed: Directly addresses the destruction of nature by corporate interests for profit.	Speak Up (Activism): The Lorax speaks for the trees, reminding us that the environment has no voice against corporate power unless people stand up for it.
Zootopia (2016) 	Prejudice and Stereotyping: Uses the metaphor of different animal species to directly address themes of prejudice, stereotyping, and implicit bias within a society.	Look Beyond Labels: Diversity is a strength, but we must actively work to break down the stereotypes we hold about others. True acceptance requires looking past superficial differences.
Brave (2012) 	Fate and the Natural Order: The story emphasizes that tampering with nature's "wisps" or ancient spirits leads to chaos; true harmony comes from respecting the natural path of life.	Respect Nature's Balance: Trying to force a change in the natural world for selfish reasons can have unintended consequences. We must listen to nature rather than trying to control it.

Movie (Year)	Core Message	Key Takeaway for Students
Onward (2020) 	Industrialization vs. Magic: The movie expresses grief and the loss of "magic" (nature/wonder) in favour of modern convenience and technology that has paved over the world's natural history.	Reconnect with the Wild: Don't let technology make you forget the wonders of the physical world. Convenience shouldn't come at the cost of losing our connection to the outdoors.
Up (2009) 	Wildlife and Habitat Preservation: The plot revolves around protecting rare species and natural landmarks from exploitation and urban greed.	Be a Protector: True adventure lies in protecting life, not possessing it. Preserving the world's "Paradise Falls" is more important than personal trophies or fame.
Soul (2020) 	Appreciating the Physical World: The film teaches that "life" isn't just about big goals, but the "spark" found in small natural moments—like a falling leaf or the feeling of the wind. It teaches us how to value life and enjoy even small, joyful moments.	Presence in Nature: Take time to stop and notice the world around you. Being environmentally conscious starts with actually noticing and appreciating the living world you inhabit.
Big Hero 6 (2014) 	Innovation for Good: It showcases how technology and robotics can be used to improve the safety and health of an urban environment.	Solving Problems with Science: Innovation should be used to help and heal others. Use your curiosity and skills to build a safer, cleaner future for your community.
Abominable (2019) 	Harmony with the Wild: The journey focuses on returning a wild creature to its natural habitat, showing that nature has its own "magic" when humans act as guardians.	Guardians of the Wild: Wildlife belongs in the wild, not in cages. We have a responsibility to help endangered species return to and thrive in their natural homes.
Inside Out (2015) 	The Internal Environment: This movie treats the human mind as a literal environment that must be kept in balance to remain healthy and sustainable.	Emotional Ecosystem: Just like a forest or an ocean, our internal mind is an ecosystem that needs every part to function. We must acknowledge all our feelings, not just the "happy" ones, to maintain a healthy and resilient mental environment.

A final thought for our students

Next time you see a trend or a celebrity challenge, ask yourself: *"Is this helping me grow, or is it just keeping me busy?"*

Choose stories that make you want to be kinder, braver, and more curious. Don't just follow the crowd, follow the values that make you **you!**

You were meant for a much bigger story than a 15-second clip.

Happy Watching, and Keep Growing!

Math Puzzle Corner (Answers)

(1) Both weigh the same — because each weighs 1 kilogram.

(2) 2 rabbits — then there must be 6 chickens.

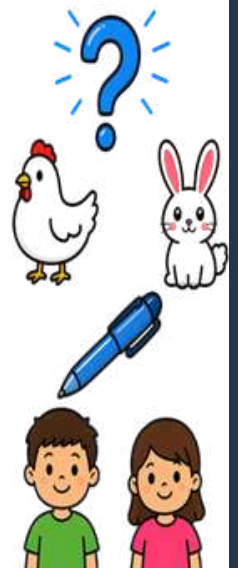

$$6 \text{ chickens} = 6 \times 2 = 12 \text{ legs}$$

$$2 \text{ rabbits} = 2 \times 4 = 8 \text{ legs}$$

$$\text{Total} = 12 + 8 = 20 \text{ legs}$$

(3) 3 people — they are a grandfather, a father, and a son.
So, there are still two fathers and two sons.

(4) 15 years old — when the boy was 10, his sister was 5, so the age difference is 5 years. When he becomes 20, she will be 15.

IMAGINATION TAKES FLIGHT

My Magic Socks

I have a pair of magic socks,
They hide inside my drawer.
But when I wear them on my feet,
Adventures start galore!
They took me to a jungle once,
With monkeys on the trees.
A tiger winked and waved at me,
While dancing in the breeze.
One day they zoomed me to the moon,
I bounced on craters high!
I waved hello to spacemen friends,
And ate a cheese moon pie.
So now they rest, all clean and neat,
Inside my magic drawer.
Just waiting for my next big trip—
Who knows what's next in store?

I LOVE MY SCHOOL

I wake up early with a smile, to get ready in a little while.

I pack my bag and tie my shoe,
My school is fun, there's so much to do!

We sing, we dance, we learn and play, and grow a little every day.

My teacher helps me do my best, and gives my brain a happy rest!

With friends around, I laugh and run, learning at school is so much fun!

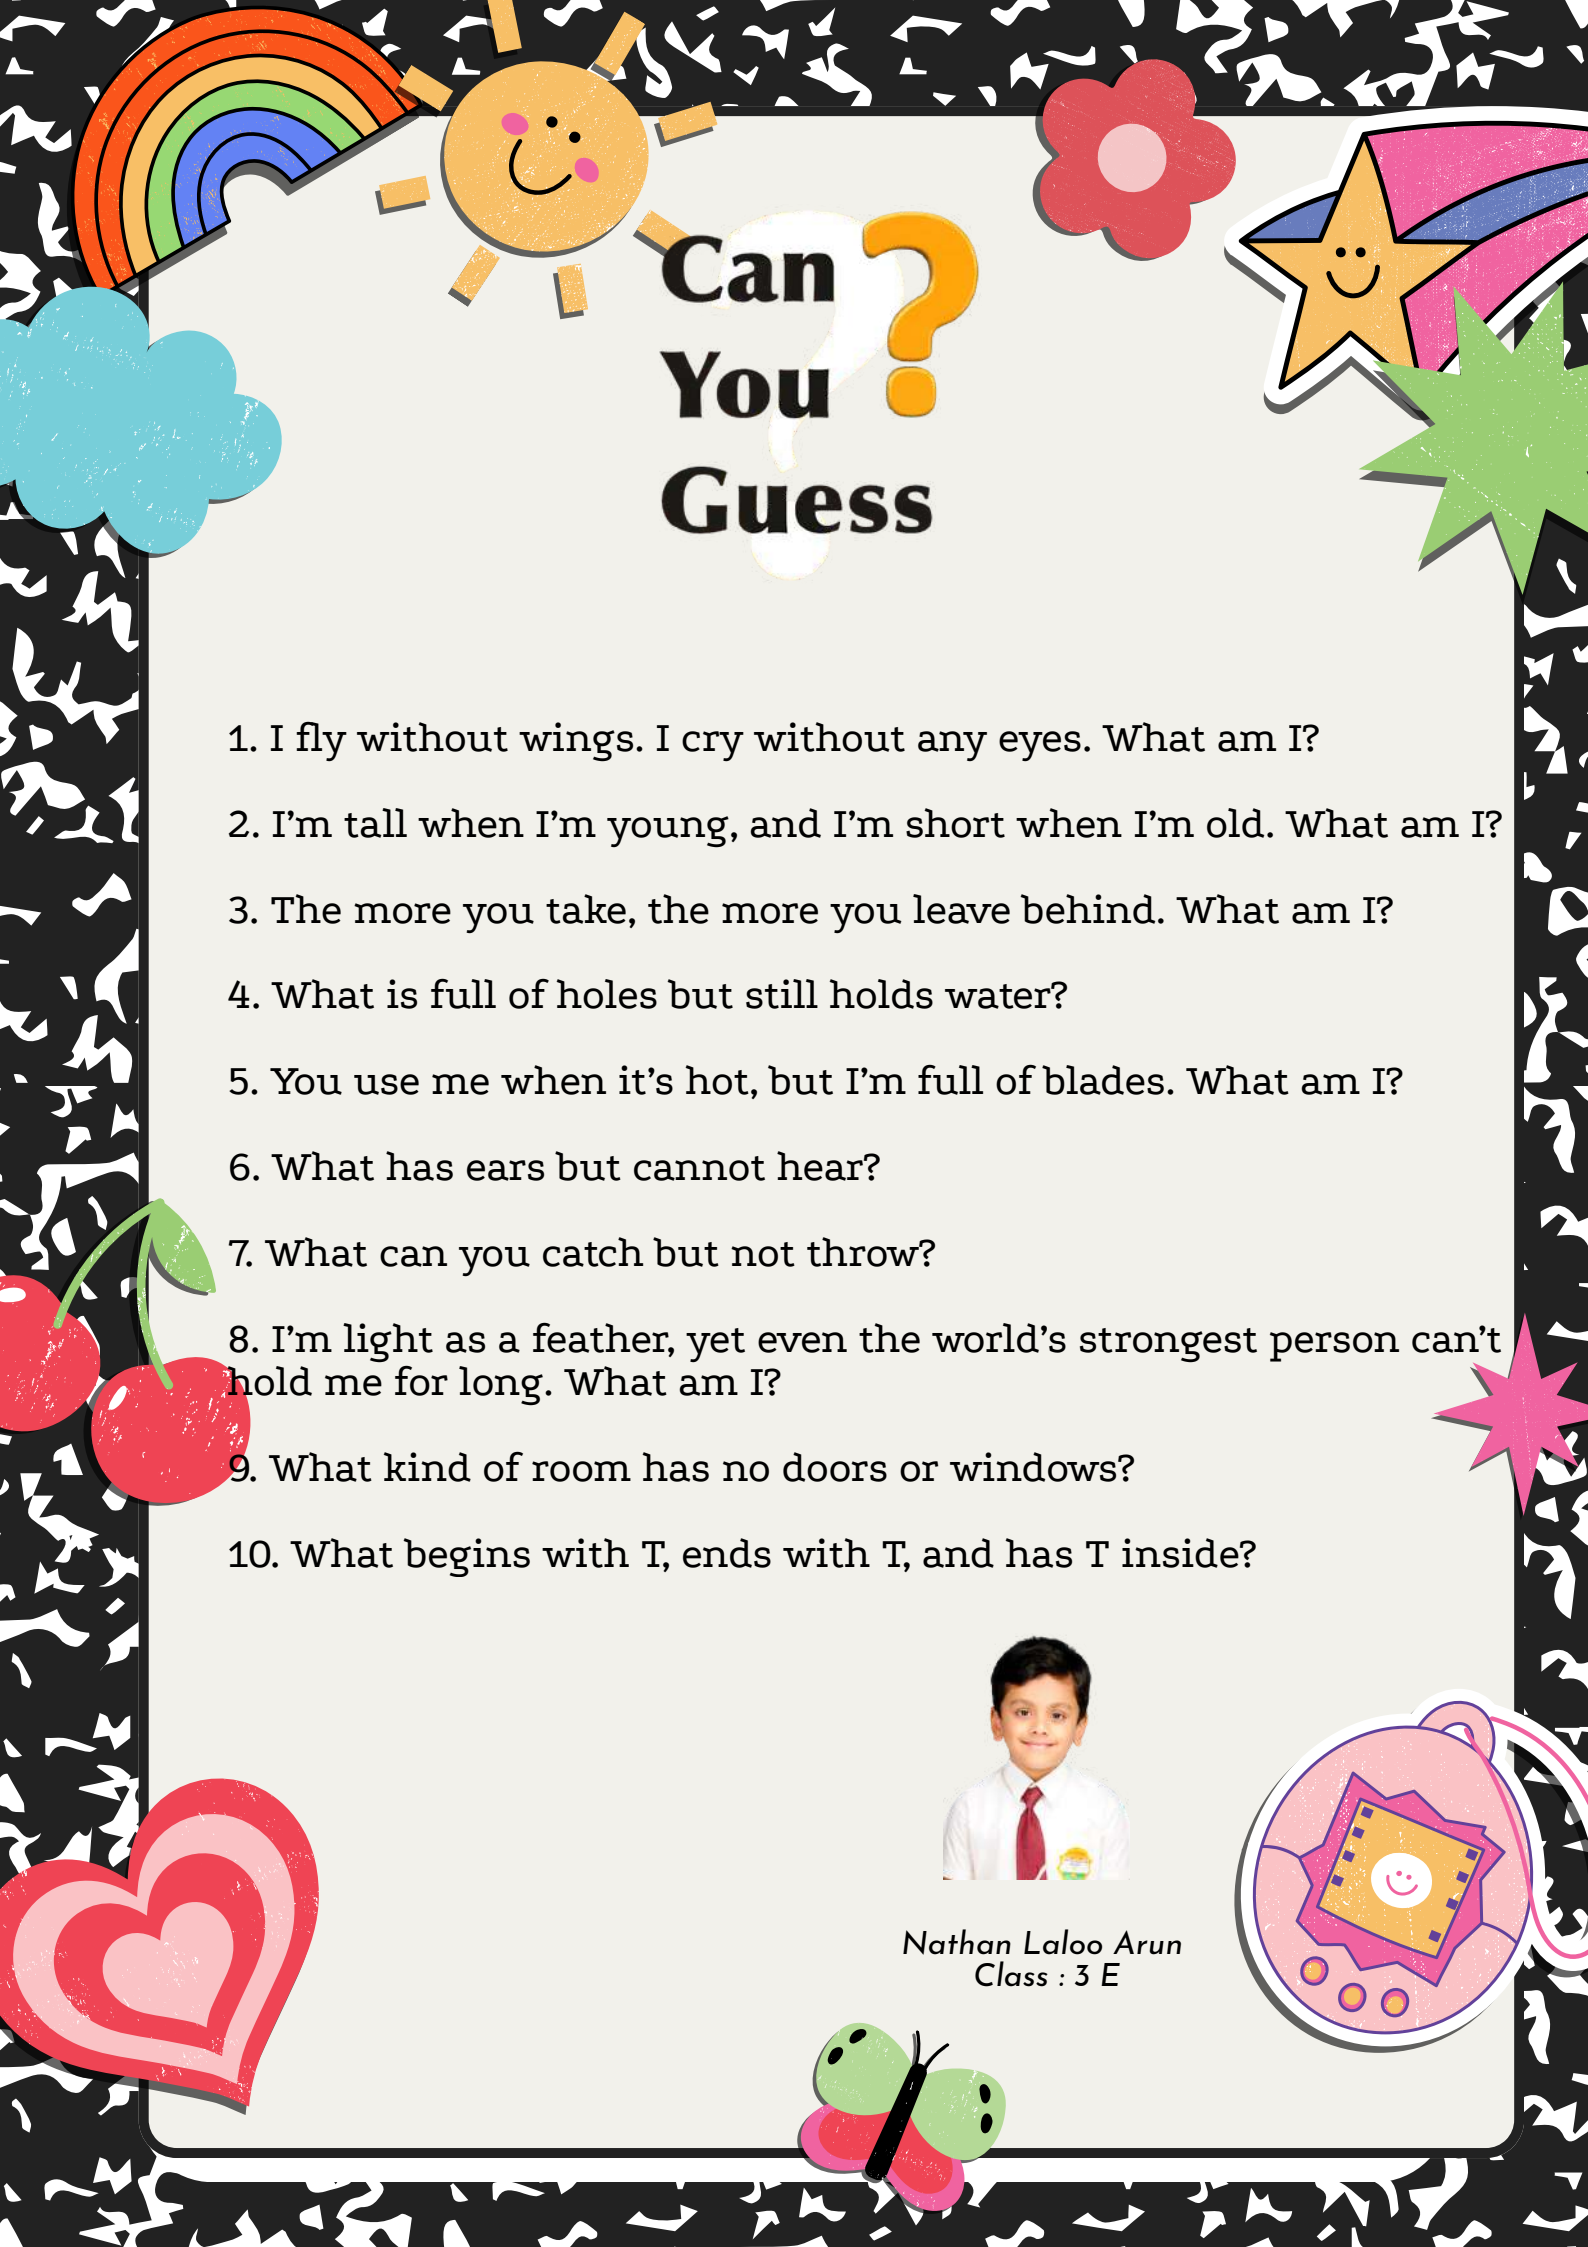

Books and colors, games and rules, that's why I love my school!

Thank you!

Can You Guess?

1. I fly without wings. I cry without any eyes. What am I?
2. I'm tall when I'm young, and I'm short when I'm old. What am I?
3. The more you take, the more you leave behind. What am I?
4. What is full of holes but still holds water?
5. You use me when it's hot, but I'm full of blades. What am I?
6. What has ears but cannot hear?
7. What can you catch but not throw?
8. I'm light as a feather, yet even the world's strongest person can't hold me for long. What am I?
9. What kind of room has no doors or windows?
10. What begins with T, ends with T, and has T inside?

MY SUMMER CAMP ADVENTURE TRIP

Nathan Laloo Arun
Class : 3 E

This summer camp, I had one of the best days ever! On June 19, 2025, our school summer camp took us to the Sheikh Abdullah Al Salem Cultural Centre in Kuwait.

We left school at 9 a.m. on our bus. The ride was fun because I sat with my camp friends. When we reached the Centre, I saw a big silver building with underground parking. Our teachers told us it's one of the biggest museums in the world. It has different sections like the Space Museum, Natural History Museum, Science & Technology Museum, and a Fine Arts Centre.

We went to the Space Museum. It felt like we were inside a spaceship! I saw rockets, planets, and astronauts. I learned that there is no air on the moon and how astronauts sleep in space. My favorite part was the space simulator – it felt like I was flying through space!

After a tasty snack, we went to the Science & Technology Museum. It was so much fun! We tried games and did some cool experiments. I learned how gears work, how electricity flows, and saw a robot arm pick things up like a real hand!

Finally, we went to the Ecosystem section.

We saw how they hung real fruits on fake made up trees. There was water around which looked like the ocean! I saw colorful fish, stingrays, and even sharks swimming behind glass. It was exciting. I didn't know the sea had so many animals.

I learned so much in one day. If you ever get the chance to visit the Sheikh Abdullah Al Salem Cultural Centre, you should go! It's fun and full of amazing things. This was my favorite trip of the summer!

Can You Guess

Answers

1. A cloud.
2. A candle.
3. Footsteps.
4. A sponge.
5. A fan.
6. A cornfield.
7. A cold.
8. Your breath.
9. A mushroom.
10. A teapot

DREAM BIG-NEVER GIVE UP

*“Dream, Dream, Dream.
Dreams transform into
thoughts and thoughts
results in action.”*

*-Dr. A P J Abdul Kalam
(1931-2015)*

**“Dreams do not need a big start, All that it needs is
Hard Work & Dedication”**

A boy was born and brought up in a small Town of Rameswaram, in the southern tip of India. He lived a very simple life and his family could not afford to buy toys, books etc; but this did not stop his love for learning. As a child, he helped his family with his ability and studied hard.

He is a very kindhearted person and always obeyed his parents. He listened to his teachers carefully and kept on trying to find something new. His ambition was to become a scientist and a part of India's growth. One day this boy achieved his dream by getting an opportunity to join one of the most prestigious space research organization named ISRO. He immediately accepted the offer and became a notable Scientist of India. This all has happened only because of his hard work and dedication. His contribution to Indian space research is remarkable and he became a part of making the country's defense missiles. He is also known as the “Missile Man of India”.

Later on he became the First Person of India; yes, he is none other than our great former president of India Dr. A.P.J. Abdul Kalam.

Friends, This story teaches that any small steps that we take forward can lead to achieving our Big Dreams. So always, dream big, listen carefully to your teachers and believe in yourself. Just like Kalam sir, if we are honest, disciplined & dedicated to our studies, I am sure the day to achieve our Dream is not far off. Every Great Journey teaches us a lesson, so please read and follow.

START TODAY – DREAM BIG

Class 5-C

Talking Space Future with Dr. S Somnath(Ex-Chairman-ISRO)

Winning the title of Outstanding Performer this year at the Shastra Pratibha Science Contest organized by SIF-Kuwait, was more than just another scholastic achievement. It also earned me a once in a lifetime opportunity to interact with the hero Chandrayan-3 - Dr. S. Somnath, former Chairman of ISRO.

The SIF-Kuwait Annual Science Gala was held on 11th April 2025 at the Kuwait College of Science and Technology, and I was selected to ask Dr. Somnath a question on Space and Science. His reply to my question was very informative and educational, and as a space enthusiast I would like to share his words with you all.

My question to Dr. Somnath was- "If you had the chance to visit any one of the planets, which one would you choose, and why?"

Dr. Somnath first made a funny reference to the famous book by John Gray- "Men are from Mars; Women are from Venus" and asked me, "Venus is for men or women?"

He then went on to say, "Venus is an interesting planet. Do you know why it is? The size of Venus is slightly smaller than that of the Earth. It rotates around its own axis in the same periodicity of the Earth, i.e. 24 hours. But its atmosphere is very thick. You all know that Earth has an atmosphere. If we calculate the Earth's atmosphere in terms of one bar, in Venus it would be equal to a hundred bars! i.e. it would be hundred times that of the Earth. Venus' atmosphere has clouds full of droplets of sulphuric acid floating around it. If you go about 40 kilometers above the surface of Venus one day, you could go and live inside a balloon, and then look at the surface of Venus and you will see that it is very fascinating.

Many Venusian movies have been made since many years, so it is still a very intriguing planet which we should go and study. For Mars, we already have a lot more information than we have about Venus. Recently you must have heard news reports about ISRO's first planned mission to Venus - Shukrayaan 1, also known as the Venus Orbiter Mission. So, the planet Venus is something which I like to go to someday."

That was a very educational and informative response from Dr. Somnath and I would like to thank SIF - Kuwait for providing us students in Kuwait with wonderful experiences like this which will help to ignite a scientific spirit, curiosity and enthusiasm in us.

The Monster of the Deep: Megalodon!

A long, long time ago — way before people existed — there was a giant shark that ruled the oceans. It was called Megalodon, and it was the biggest shark that ever lived!

The word “Megalodon” means “big tooth” — and wow, it really had HUGE teeth! Each tooth was as big as your hand, and super sharp. Megalodon could grow up to 60 feet long — that’s longer than a school bus! Can you imagine a shark that big?

It was a powerful hunter and could even eat whales! Its bite was so strong, it could crush bones in one chomp. Megalodons swam in warm oceans all over the world. But about 2 million years ago, they disappeared. No one knows exactly why, but scientists think the ocean got colder and food became harder to find.

Even though we’ve never seen a real Megalodon, we’ve found lots of its giant teeth in the ground and underwater. That’s how scientists learned about it. Cool, right?

So, Megalodons are long gone, but they’re still one of the coolest sea monsters ever!

My Stuffy Toy

**My Stuffed Toy
My cuddly toy
As cute and fluffy as can be,
With a happy face filled with joy,
Which is so-called stuffy.
With an adorable face
And so much velvety,
But made with grace ,
Which totally looks kawaii.**

**I jump on my bed
And snuggle with these cherubic soft toys,
Which, especially with their dresses , are red as roses.
At last, I sleep cuddling these cuties.
They're always so lovable ,
Also so squishy .
Oh! How adorable!
And they look so sweet.**

**Lovers of stuffed toys are always so irresistible.
Of course, how can they not? With these cuties ,
With cute bows and eyelashes, making them so huggable.
And I sleep at last with these fuzzy cuties.**

**Did you know that kawaii is a Japanese word that expresses the
word cute?
Adorable?**

HELPING ONE ANOTHER

Mohit and Mira came home from school one day. They found a lock on their door. They were puzzled. They knocked on the door of their neighbor, Mrs. Singh. She opened the door and took the children in. She said, “children do not worry your grandmother is very ill. Your mother had to take her to the hospital. I will give you your lunch. What would you like to eat? I will cook that. In the meantime, you both can finish your homework”. Mohit and Mira were sad to hear about their grandmother. They sat down at the table, and quickly finished their homework. Mrs. Singh cooked a delicious meal. The children said a prayer and ate their lunch.

In the evening, their father returned home. He thanked Mrs. Singh for the help and took the children home. The father was very happy with Mohit and Mira for having completed their homework. Soon, there was a phone-call. The mother said that their grandmother was feeling better, and she would return back home.

MORAL OF THE STORY: Never lose your trust in helping others

WHAT IS A PARASAUROLOPHUS

The **Parasaurolophus [crested lizard]** was a large duck-billed herbivore dinosaur, known for its long backward- curving cranial crest, living in the late cretaceous period dominating landscapes across North America, Asia, Europe and even Antarctica. Its distinctive hollow bony crest, likely used as a resonating chamber to produce deep communication frequencies, sounds like a trombone for warnings and social signaling by blowing air through internal passages similar to a natural saxophone. It grew up to 30 feet long and weighing several tons, they lived around 76 million years ago,

LIFE STYLE OF THE PARASAUROLOPHUS

Inhabited in warm floodplains and forests, often near water sources, but were fully land based. Their diet consisted of ferns, pine needles, twigs and bark using their shovel-like beak to snip vegetation and complex teeth for grinding.

REPRODUCTION OF PARASAUROLOPHUS

Parasaurolophus reproduce by laying eggs around grapefruit sized in communal nesting sites. Nests were packed with decaying plants, mud and leaves to generate heat for incubation. Juveniles hatched without fully developed crests and grew quickly to avoid predators.

Class 6-A

WHAT IS A SPINOSAURUS AEGYPTIACUS

Adithyan Abhilash Kurup,
Class 6-A

Spinosaurus Aegyptiacus means [spine-lizard from Egypt] was a semi-aquatic fish-eating dinosaur, from the Cretaceous period in North Africa. The skull of the Spinosaurus was long, low and narrow similar to crocodilian-like snout, had conical teeth for grasping slippery prey, back spine, had powerful forelimbs with large claws capable of bipedal movement on land and unique paddle-tail that made it an agile swimmer, it was larger than the Tyrannosaurus Rex predatory dinosaur. It grew up to 50 feet long, weighing up to 20 tons making it one of the largest carnivorous dinosaurs.

THE LIFE STYLE OF THE SPINOSAURUS

Spinosaurus inhabited humid environments like tidal flats, mangrove forests and large rivers. The back spine was possibly used for body heat, attracting mates and scaring rivals. Spinosaurus primarily was a semi-aquatic fish-eating and terrestrial prey. Onchopristis was a species of giant saw fish and may have been on the menu for Spinosaurus.

REPRODUCTION AND DEVELOPMENT OF THE SPINOSAURUS

AEGYPTIACUS Spinosaurus reproduced by laying eggs, nesting near water in areas with plant cover. Newborns were tiny, about 1 foot long, and faced threats from large fish, crocodiles and even siblings. They grow rapidly with features like its paddle tail and head crests as they mature. Their diet started with insects, frogs and dead fish and learned to hunt bigger prey as they grew.

My North India Trip Experience

Darssha Madhan Kumar

6 B

My North India trip was one of the most unforgettable adventures of my life! We started from Delhi, where the mix of history and modern life really amazed me. I visited the Red Fort with its huge red sandstone walls and then the tall Qutub Minar, covered in beautiful carvings. India Gate also stood proudly in the heart of the city.

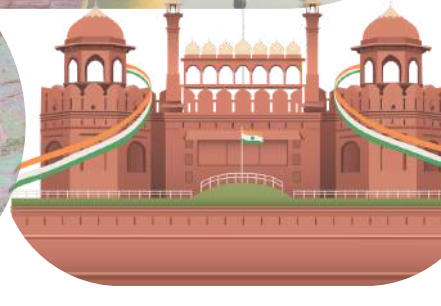

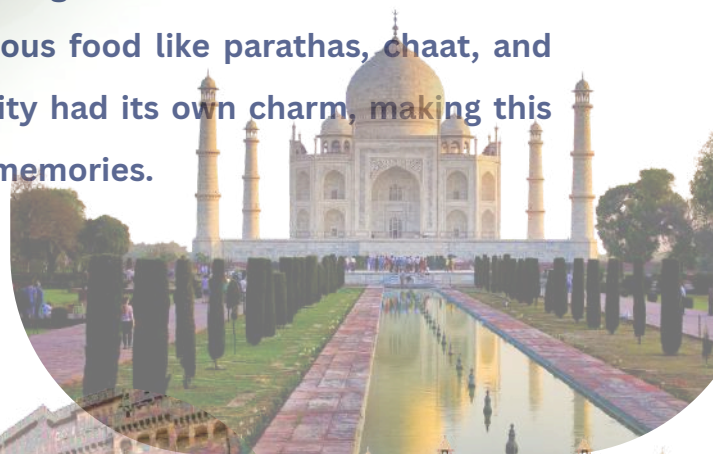

From there, we went to Agra to see the breathtaking Taj Mahal, built by Shah Jahan for Mumtaz Mahal. Its white marble looked like a dream! I also explored Agra Fort, with its massive gateways and royal courtyards.

Next was Jaipur, the Pink City. We went up to the Amber Fort on an elephant, and the sparkling Sheesh Mahal looked like a sky full of stars. The famous Hawa

Mahal, with its tiny windows, looked like a pink honeycomb.

In Jodhpur, the Blue City, the mighty Mehrangarh Fort towered over blue-painted houses. Its royal rooms and weapon displays made me imagine the world of ancient warriors. Our final stop was Udaipur, the City of Lakes. The beautiful City Palace stood beside Lake Pichola, and our evening boat ride felt magical with golden skies and shimmering reflections.

Throughout the journey, I enjoyed delicious food like parathas, chaat, and kulfi, and met many kind people. Each city had its own charm, making this trip full of fun, colour, and unforgettable memories.

ICSK जूनियर में मेरी यात्रा: मेरे जीवन का एक महत्वपूर्ण मोड़

कहते हैं कि कभी-कभी जीवन के सबसे अच्छे निर्णय अप्रत्याशित रूप से आते हैं। मेरे लिए 5 वीं कक्षा में ICSK जूनियर में शामिल होना बिल्कुल वैसा ही था—एक ऐसा निर्णय जिसने शिक्षा और जीवन के प्रति मेरे पूरे दृष्टिकोण को बदल दिया। ICSK जूनियर में मैंने जो खोजा वह संभावनाओं की एक बिल्कुल नई दुनिया थी। शैक्षणिक विषयों के अलावा, अनगिनत अवसर थे—स्कूल प्रतियोगिताएं, कार्यक्रम, परियोजनाएं, खेल दिवस, और अपनी प्रतिभा दिखाने के लिए कई और मंच। हर महान स्कूल अपने शिक्षकों की नींव पर खड़ा होता है, और ICSK जूनियर कुछ वास्तव में उल्लेखनीय शिक्षकों से धन्य है। उनका मित्रवत दृष्टिकोण, सीखने को एक खुशी बना देता है। फिर ऐसे शिक्षक हैं जो पढ़ाते समय गुस्सा हो सकते हैं, फिर भी हर अवधारणा को समझाने के लिए उनका समर्पण हमें उन पर वास्तव में गर्व महसूस कराता है। ICSK जूनियर का सबसे परिवर्तनकारी पहलू हमारी दैनिक स्कूल सभा है। तरंग के माध्यम से RJ ने हमें ऐसे तरीकों से सिखाया और प्रशिक्षित किया है जो सुबह की घोषणाओं से कहीं आगे जाते हैं। इसने भाषण देने के लिए हमारा आत्मविश्वास बनाया है, हमें अपने विषयों पर अधिक गहराई से शोध करने के लिए प्रशिक्षित किया है, और हम में से हर एक को विशेष महसूस कराया है। 360 डिग्री घूमते कैमरे की तरह, स्कूल को अनुशासित तरीके से चलाने के लिए सभी पर नज़र रखते हुए, हमारी पसंदीदा प्रिंसिपल मैडम शीजा हैं। उनका नेतृत्व हर उस चीज़ की रीढ़ है जो हम हासिल करते हैं।

गर्व के पल-एक स्मृति जिसे मैं हमेशा संजोकर रखूँगी। वह है अंतर-स्कूल नाटक प्रतियोगिता। इतने कम समय में आपने जो समय और ऊर्जा लगाई वह उल्लेखनीय थी, और मुझे खुशी है कि उन प्रयासों ने हमें दूसरा पुरस्कार दिलाने में मदद की। मुझ पर और हम सभी पर विश्वास रखने के लिए धन्यवाद।

हार्दिक धन्यवाद-जब मैं अपनी यात्रा पर विचार करती हूँ, तो मुझे एहसास होता है कि ICSK जूनियर ने मुझे वह दिया जो मैं खोज रही थी-सिर्फ अच्छे ग्रेड वाले छात्र से अधिक होने का मौका। प्रबंधन, शिक्षकों, कर्मचारियों और मेरे साथी छात्रों को-ICSK जूनियर को सिर्फ एक स्कूल नहीं बल्कि एक ऐसा घर बनाने के लिए धन्यवाद जहाँ सपने उड़ान भरते हैं और प्रतिभाएँ अपनी आवाज़ पाती हैं। यह सिर्फ मेरी कहानी से अधिक है; यह इस बात का प्रमाण है कि ICSK जूनियर क्या दर्शाता है-एक ऐसी जगह जहाँ हर छात्र महत्वपूर्ण है, हर प्रतिभा का पोषण किया जाता है, और हर सपना संभव है। यह लेख लिखने और आप सभी के साथ अपनी यात्रा साझा करने का अवसर प्रदान करने के लिए धन्यवाद।

कन्याकुमारी की मेरी पारिवारिक यात्रा

छुट्टियों के दौरान, मैं अपने माता-पिता और दादा-दादी के साथ कन्याकुमारी घूमने गई। यह एक बहुत ही खास यात्रा थी क्योंकि मेरे दादा-दादी ने पहली बार हवाई यात्रा की थी। हमने बरसात के मौसम में यात्रा की, जिससे यात्रा और भी खूबसूरत हो गई। सबसे पहले, हमने केरल में अनंत पद्मनाभ स्वामी मंदिर के दर्शन किए। मंदिर की वास्तुकला बहुत ही सुंदर थी। हम सुबह-सुबह मंदिर के अंदर गए और वहाँ के शांत वातावरण ने हमें सुकून और खुशी का एहसास कराया। दर्शन के बाद, हम होटल लौट आए। बाद में, हमने इसरो अंतरिक्ष संग्रहालय का दौरा किया। यह यात्रा इसलिए खास थी क्योंकि मेरे पिताजी पहले वहाँ काम कर चुके थे। हमने रॉकेट, उपग्रह और अंतरिक्ष विज्ञान के बारे में कई रोचक बातें सीखीं। इससे हमें अपने देश पर गर्व हुआ। फिर हम कार से कन्याकुमारी के लिए रवाना हुए। होटल में आराम करने के बाद, हम शहर घूमने निकले। कन्याकुमारी सूर्योदय और सूर्यास्त के नजारों के लिए प्रसिद्ध है। सूर्योदय देखना अद्भुत था। खराब मौसम के कारण, हम विवेकानंद रॉक नहीं जा सके। हमने 1601 ईस्वी में निर्मित पद्मनाभपुरम महल भी देखा। इतने पुराने समय में बने इतने सुंदर महल को देखकर मैं आश्चर्यचकित रह गए। इस यात्रा ने मुझे सुखद यादें और नया ज्ञान दिया।

“आखिरी पत्र”

राजगढ़ नाम के कस्बे में एक बुजुर्ग डाकिया रहता था—नाम था माधव।

माधव पिछले चालीस साल से लोगों तक चिट्ठियाँ पहुँचाता आया था। गाँव का हर बच्चा उसे ‘माधव काका’ कहकर बुलाता था।

लेकिन अब ज़माना बदल रहा था।

लोग मोबाइल पर बात करने लगे थे, चिट्ठियाँ आना कम हो गई थीं। फिर भी माधव रोज़ भीगे रास्तों, धूल भरी गलियों और धूप में तपती पगडंडियों पर चलता था—जैसे किसी पुराने वादे को निभा रहा हो।

एक दिन, डाकघर में एक बहुत पुराना, धूमिल-सा लिफ़ाफ़ा मिला। तारीख देखी तो सब हैरान रह गए—

“17 जुलाई, 1984”

डाकघर के नए अधिकारी ने कहा,

“शायद गलती से किसी पुराने बक्से में अटक गया होगा। पर इसे अब देने का फायदा?”

माधव ने लिफ़ाफ़ा उठाया।

उस पर लिखा था:

“प्रिया के नाम – बसंती कुंज, राजगढ़।”

माधव की आँखों में चमक आ गई।

“मैं इसे पहुँचाऊँगा,” उसने दृढ़ता से कहा।

वह पते की तरफ चला, लेकिन जगह अब बदल चुकी थी।

छोटी-छोटी झोपड़ियाँ अब पक्के मकानों में बदल चुकी थीं।

उसने कई घरों में पूछा, मगर कोई ‘प्रिया’ को नहीं जानता था।

थककर वह एक पुराने नीम के पेड़ के नीचे बैठ गया। तभी

सामने से एक सत्तर-पचहत्तर साल की बुजुर्ग महिला धीरे-धीरे

आती दिखी। हाथ में टोकरी और चेहरे पर वर्षों की थकान।

माधव ने पूछा, “माता जी, क्या आप यहाँ बहुत सालों से रहती हैं?”

महिला मुस्कुराई, “जन्म से, बेटा। बताओ, क्या बात है?”

माधव ने लिफ़ाफ़ा दिखाया।

महिला का चेहरा अचानक बदल गया।

उसकी आँखें नम हो गईं।

“यह... यह तो मेरे पति रवि का आखिरी पत्र होना चाहिए।”

उसने काँपते हाथों से लिफ़ाफ़ा लिया।

माधव चुपचाप खड़ा रहा।

महिला ने कहा,

“रवि सेना में थे। 1984 में एक अभियान में शहीद हो गए।

उन्होंने कहा था कि लौटकर एक चिट्ठी ज़रूर लिखेंगे... शायद यह वही है।”

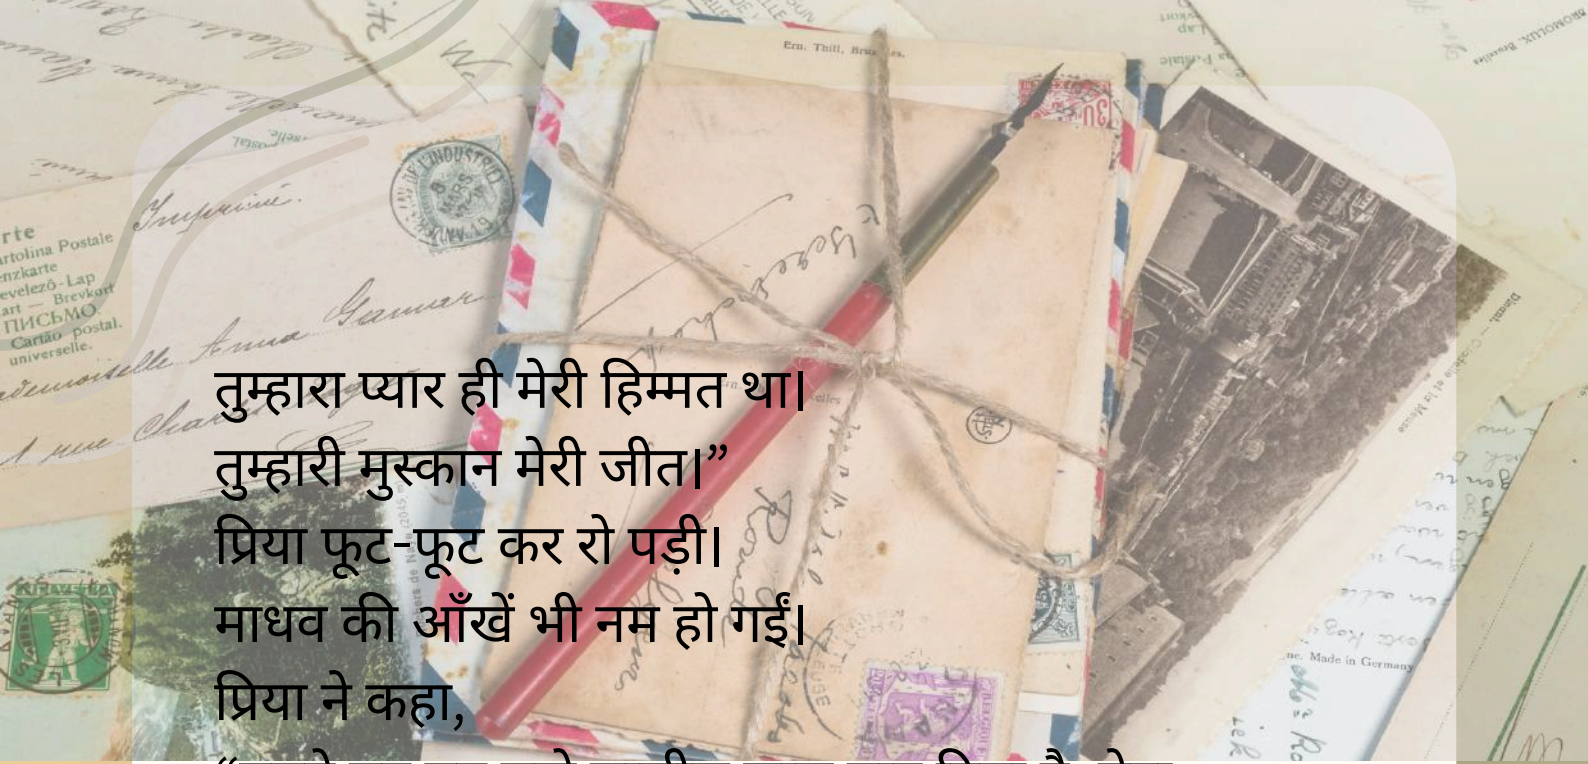

उसने लिफ़ाफ़ा खोला।

अंदर एक छोटा-सा कागज़ था:

“प्रिय प्रिया,

अगर मैं लौट न सका तो याद रखना—

तुम्हारा प्यार ही मेरी हिम्मत था।
तुम्हारी मुस्कान मेरी जीत।”
प्रिया फूट-फूट कर रो पड़ी।
माधव की आँखें भी नम हो गईं।
प्रिया ने कहा,
“तुमने यह पत्र मुझे चालीस साल बाद दिया है, बेटा...
लेकिन कुछ इंतज़ार कभी देर नहीं करता।”
माधव मुस्कुरा दिया।
उसे महसूस हुआ कि वह सिर्फ़ एक पत्र नहीं,
किसी का अधूरा वादा पूरा करके आया है।
उसी शाम, माधव ने तय किया—
जब तक उसके कदम चलेंगे,
वह हर चिट्ठी पहुँचाएगा...
चाहे वह कितने ही साल पुरानी क्यों न हो।

**SAIFUDIN KUTBUDDIN

"THE LIGHTHOUSE OF FORGOTTEN DREAMS"

ON THE ROCKY COAST OF MERROWDALE STOOD AN OLD LIGHTHOUSE NAMED HAVEN'S WATCH. FOR DECADES IT HAD GUIDED SHIPS THROUGH STORMS, BUT NOW IT WAS ABANDONED—ITS PAINTS PEELING, WINDOWS CRACKED, AND ITS GREAT LAMP BROKEN.

ONLY ONE PERSON VISITED IT REGULARLY: ELENA RIVERS, A YOUNG MARINE BIOLOGIST WHO HAD GROWN UP HEARING STORIES ABOUT THE LIGHTHOUSE FROM HER GRANDMOTHER.

HER GRANDMOTHER ONCE SAID,

"THAT LIGHTHOUSE DOESN'T JUST GUIDE SHIPS... IT HOLDS PEOPLE'S DREAMS."

ELENA NEVER UNDERSTOOD WHAT THAT MEANT—UNTIL ONE STORMY EVENING.

SHE HAD GONE TO STUDY THE UNUSUAL TIDES NEAR THE CLIFFS WHEN THE SKY TURNED DARK, AND RAIN BEGAN POURING. WITH NOWHERE ELSE TO GO, SHE RAN INTO THE LIGHTHOUSE FOR SHELTER.

INSIDE, SHE FOUND SOMETHING STRANGE:

A FAINT GLOW COMING FROM THE TOP ROOM.

CURIOUS, ELENA CLIMBED THE SPIRAL STAIRS.

THE GLOW GREW STRONGER—SOFT, GOLDEN, ALMOST ALIVE.

AT THE TOP, SHE FOUND A CRYSTAL ORB RESTING WHERE THE OLD LAMP SHOULD HAVE BEEN.

IT PULSED LIKE A HEARTBEAT.

WHEN ELENA TOUCHED IT, THE ROOM FILLED WITH IMAGES—

FLOATING LIKE FRAGMENTS OF MEMORIES.

SHE SAW A BOY PAINTING DREAMS OF TRAVELING THE OCEANS...

AN OLD SAILOR WISHING TO MEET HIS ESTRANGED SON...

A YOUNG WOMAN HOPING TO PUBLISH HER FIRST BOOK...

A CHILD WISHING FOR HER FATHER'S SHIP TO RETURN SAFELY...

THEY WEREN'T ELENA'S MEMORIES.

SUDDENLY, A WHISPER ECHOED THROUGH THE ROOM:

"EVERY DREAM LEFT BEHIND FINDS A HOME HERE."

ELENA'S EYES WIDENED.

THE LIGHTHOUSE WASN'T ABANDONED—

IT WAS FULL. FULL OF DREAMS PEOPLE FORGOT,

DREAMS THEY ABANDONED,

DREAMS THEY NEVER DARED TO CHASE.

LIGHTNING FLASHED OUTSIDE.

THE ORB GLOWED BRIGHTER, SHOWING ELENA A FINAL VISION—

HER GRANDMOTHER STANDING IN THE LIGHTHOUSE, DECADES AGO, PLACING HER OWN DREAM INTO THE ORB:

"I WISH FOR MY GRANDDAUGHTER TO FIND HER PATH."

TEARS FILLED ELENA'S EYES.

SHE FINALLY UNDERSTOOD:

HER GRANDMOTHER NEVER WANTED HER TO JUST STUDY THE OCEAN.

SHE WANTED HER TO DISCOVER HERSELF.

THE STORM PASSED.

ELENA WALKED OUT OF THE LIGHTHOUSE WITH A NEW PURPOSE.

IN THE DAYS THAT FOLLOWED, SHE RESTORED HAVEN'S WATCH.

PEOPLE BEGAN VISITING, PLACING NOTES, DRAWINGS, HOPES, AND FORGOTTEN DREAMS INSIDE THE LIGHTHOUSE.

AND SOON, THE WORLD BEGAN CALLING IT:

"THE LIGHTHOUSE OF FORGOTTEN DREAMS."

IT BECAME A PLACE WHERE PEOPLE CAME NOT JUST TO REMEMBER WHAT THEY HAD LOST—

BUT TO REDISCOVER WHAT THEY COULD STILL BECOME.

AN ADVENTUROUS ELEPHANT RIDE

This happened during the winter break in 2025. It was extremely cold outside, and we longed to go to a warm place. We decided to visit Sri Lanka this time. I was excited to visit that island country as I heard that it resembles Kerala in many ways. When we landed there, I understood that it was true and every place there looked so much like Kerala.

We went for a 6-day trip and on the second day an elephant ride was scheduled in our itinerary. I couldn't wait to get on the elephant. But at the same time, I feared heights. By the time we reached the destination, the elephant was all ready to take us for the ride. It looked smaller than the elephants that I have seen before. They said that we can go in groups of two. So, my dad and I decided to go first. I wondered how we would get on the elephant. Then they lead us to a platform built a bit higher than the elephant's height and we could reach there through wooden steps. We both climbed up and reached the platform. We had to remove our shoes. Then the elephant came slowly and stood near the platform in such a way that we can step on its back and take our seats on it. I was scared thinking that what if the elephant moves when we try to get on it? So many thoughts passed my mind. My dad stepped on first and sat on the elephant. Seeing that I regained my confidence, stepped on it and took my seat just near my dad. The hairs on its body were long and sharp. Luckily there was a cloth over the elephant, on which we sat. There was a rope too to hold on tightly.

The elephant started to move slowly, and I was afraid of falling. It kept on walking and wouldn't stop. I noticed that people passing by were taking pictures and we were going through the main road. For a few minutes the road was blocked because of our elephant ride. Slowly I started to enjoy the ride and the thought that my dad is there with me made me bolder.

The elephant walked for a few more minutes and we reached a lake near the famous "Sigiria Rock". The elephant slowly walked into the lake. The person controlling the elephant said something which I didn't understand. When he puts his hands down and said those mysterious words the elephant would put its trunk down and collected water from the lake. When he showed his hands upwards the elephant raised its trunk and splashed and sprayed water. The man took our pictures too near the rock when the elephant was splashing the water. It looked so good. Then it was time for us to return to the starting point. By that time we started enjoying that ride without any fear.

We came to know from the care taker that the elephant's name is "Rani" and she is 36 years old. The elephant stopped exactly near the platform and we stepped out.

Now it was my mom's and sister's turn to enjoy the ride. But unfortunately, due to her fear of heights my mother couldn't take the ride even though she tried. My dad got the privilege to accompany my sister and go for a second ride.

I will never forget this adventurous ride in my lifetime. It was a wonderful experience which I enjoyed a lot.

ASTRONOMY CLUB

For Classes 4 - 6

Dear Parents,
Greetings from ICCK.

With the overwhelming response from students, we are delighted to announce the commencement of the second batch of the Astronomy Club this month for students of Classes IV to VI for the academic year 2025-27.

The Club aims to nurture scientific curiosity and enhance awareness of the wonders of the universe. The activities have been thoughtfully designed to make learning engaging and experiential, and will include the following:

- * The Club will be from 18/04/2025 to 17/03/2027.
- * Once a month, students will be shown carefully curated audio-visual presentations highlighting the latest developments and discoveries in astronomy.
- * Additionally, an engaging online activity will be conducted every month to keep students curious and inspired throughout the year.
- * Once each term, an online interactive session will be conducted using a professional astronomer who will be arranged to provide students with expert insights and inspiration.
- * Weekly astronomy updates will be shared with students for use during class assemblies, helping them stay informed and confident.
- * Once a term, a night sky-gazing session will be conducted using a professional telescope, during which parents are also welcome to participate.

The annual fee for the Astronomy Club is KD 2,500 per student. An additional KD 1 will be charged for participation in the telescope-based sky-gazing sessions.

We believe this initiative will greatly enrich our students' learning experiences and foster a lifelong interest in science. Interested students can register their names by paying KD 2,500 to the school cashier on or before 12th April 2025.

We look forward to your enthusiastic participation.

C. Sheeja
